CANDIDATE 01 | APPLIED AI / LLM ENGINEER

Bengaluru, Karnataka | Relevant experience: 4.5 years

PROFILE

Applied AI engineer building Python services and production LLM features.

Owns retrieval quality, latency and evaluation from prototype through release.

SKILLS

Python, LLMs, RAG, LangChain, FAISS, prompt engineering, evaluation,
FastAPI, REST APIs, Docker, AWS, CloudWatch, CI/CD

EXPERIENCE

Applied AI Engineer | fictional product studio | 2022 - present

Built a retrieval-augmented support assistant over 40,000 knowledge articles.

Designed ingestion, chunking, embeddings, FAISS retrieval and reranking.

Deployed Python and FastAPI services on AWS; containerized with Docker.

Created 180-question evaluation set; improved grounded answer rate from 71% to 89%.

Added citation checks, prompt-injection tests, latency dashboards and fallbacks.

PROJECT

Released a multilingual FAQ assistant to 2,300 internal users; tracked adoption.

EDUCATION

B.E. Computer Science | fictional institute | 2021
